WORK EXPERIENCE

Kingdom Death *Senior Frontend Engineer*

October 2025—present | Remote

Kingdom Death is a brand comprising an intricate cooperative board game and software allowing users to digitize game assets and connect to the Kingdom Death web store, which is hosted by Shopify.

- Steer the legacy code towards a functional, idiomatic, and modern version of React by systematic refactoring and interfacing with AI agents
- Improve existing UI by leveraging React hooks, memoization, and unit testing
- Document existing tech debt, deprecated libraries, and bugs
- Migrated codebases from Create React App to Vite server for faster build time and leaner dependencies in addition to avoiding deprecation

Civiqs *Software Engineer*

May 2022—March 2025 | Remote

Civiqs is an online polling and analytics company that automates the complex process of conducting opinion surveys, including sampling, interviewing, and modeling results. The engineering team maintains the surveying software, the administrative platform, and the intricate database of survey responses and user data.

- Introduced TypeScript and unit testing to strengthen frontend code
- Scaffolded entire API with authentication for new user subscription product
- Developed new survey-building UI to allow randomizing survey questions
- Performed database migrations for backfills and table maintenance
- Converted marketing site to headless CMS to streamline admin workflow
- Facilitated QA by writing feature tests in collaboration with stakeholders
- Seamlessly converted previous admin codebase built in Rails Views to React

Upstatement *Software Engineering Apprentice*

June 2021—February 2022 | Remote

Upstatement is a digital product studio that partners with startups, media companies, and publishers to bring about meaningful change.

- Shipped production-ready code for developing start-up's iOS app
- Spearheaded marketing site project allowing clients to leverage headless CMS
- Crafted custom animations using open-source code and keyframes
- Interfaced directly with stakeholders, project managers, and designers

EDUCATION

The Grace Hopper Program at Fullstack Academy

October 2020—February 2021
Immersive Software Engineering

Pratt Institute

August 2008—June 2012
Bachelor in Fine Arts for Creative Writing

SKILLS

Languages

JavaScript, HTML, CSS, Ruby,
TypeScript, Python

Frameworks

React & React Native, Node, Express,
Next, Phaser, Sequelize, Redux, Rails,
Pydantic, Tailwind, Remix, Payload

Tools

Git, PostgreSQL, Jira, Sanity, Netlify,
Webpack, AWS, Docker, Figma, Jest,
JupyterLab, SQLAlchemy, Vite, Vercel

Creative

Writing, Printmaking, Independent
publishing, InDesign, Photoshop

SELECTED PROJECT

Concrete World

Phaser, Express, Webpack

Solo Developer | January 2021—June 2021

concrete-world.netlify.app/

github.com/sathytrench/ConcreteWorld

A platforming game where the user scores points by collecting flowers while avoiding bouncing enemies.

- Utilized the Phaser.js physics arcade engine and ES6 class syntax
- Set ambiance of game-play with my own sprites, animations, and hand-drawn artwork.
